

JLG Forklift Part

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora started out on a cross country voyage in their RV. Newly retired, after spending many years working with his brother to build their crane business into an industry leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

Whilst on their trip, John spent time talking to former business acquaintances whom the Groves stopped to visit along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John discovered an infinite marketplace for a product that could promptly and safely lift individuals in the air to accomplish upkeep and other building services.

Upon returning from their travels, John formed a partnership with two friends and acquired a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty staff, they designed and sold the first JLG aerial work platform. The business incorporates some of the basic design elements of that original lift into current versions.

JLG lift trucks have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. At present, the company proudly continues to expand itself into different marketplaces worldwide and develops new products to make certain customers are capable of being more effective and perform in the workplace within a safer environment.
