

## Aerial Work Platforms

Aerial Work Platform - There are various lift truck accessories accessible on the market. They can help transform your forklift so that you can expand your ability to pick stuff up or finish clean up tasks and material handling with less effort.

Several of the accessories are specifically designed so as to fit on the forks themselves. Blade extensions for example, are used when you need much more blade length, which increases lifting capability. Fork extensions come in lengths varying from 48-120 inches. Rounded or triangular attachments are one more type utilized if transferring rolled material so as to make sure it does not roll off of the typical flat forks.

Examples of lifting attachments include pivoting and telescoping crane or boom accessories. They could come in quite a few different kinds and are usually intended for transferring poles, metal bars, lumber and other sort of bulky objects. Additional attachments like for example different kinds of hooks and hook plates are obtainable to carry stuff with a sling or chain. Magnetic lifters and slab lifters are other stuff which could be utilized along with hook accessories. Slab lifters are specialized attachments that are used for lifting different materials that are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools which attach to your lift truck so as to make transferring rolls of carpet easier. The accessory hooks onto the lift truck's forks and has a pole which goes through the middle of the carpet roll.

There are numerous various kinds of forklift attachments that could be designed for facility maintenance like snow forks. These forks attach to front end loaders and can transport materials such as soil, snow and dirt. Other popular cleanup accessories comprise magnetic sweepers and standard sweepers. Standard sweepers comprise a broom which the forklift blades hook onto for sweeping large spaces such as warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in places where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up quick and easy.

Material spreaders are other attachments used on lift trucks. These spreaders are useful for a range of applications like for instance spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Work platforms are another optional lifting attachment that a lot of businesses use everyday. The platforms range in size from 36" x 36" to up to 60" x 60". There are some units accessible which are capable of folding up and storing into a smaller space. Work platforms are designed to raise staff up to an overhead location with the use of the forklift. Larger platform units have additional space for employees in order to bring tools and other necessary stuff intended for the job. Normally work platforms are made of poly material or steel.
